

SPECIFICATION SHEET

Glove Style: TUFF-E-NUFF

Description:

Guardian Angel Tuff-E-Nuff seamless Grey liner glove, Palm is ribbed finish (for better grip) with smooth nitrile coating.

The 13G blended Spandex liner construction delivers a softer touch and higher flexibility. Nitrile coating has strong oil-resistance without sacrificing any high abrasion function, also soft feeling for gripping and anti-slip.

Guardian Angel Tuff-E-Nuff gloves have been treated to give a long-lasting hygienic freshness and optimal wear comfort, prevents development of microbially caused odours.

Designed for a multiple range of industries and mechanical risks exposure. It is the ideal safety glove for general maintenance and assembling work both indoor or outdoor.

Sizes Available:

SIZE AS PER EN 420	CUFF COLOUR
8	Yellow
9	Green
10	Blue

Cleaning & Maintenance:

Gloves should not be left in contaminated condition if re-use is intended especially if potential hazards exist. Before removal from the hands excess contaminant should first be removed however, should this not be possible, it is advisable to ease left and right hand gloves off using the gloved hand & remove the gloves without the contaminant contacting the bare hands. The gloves may then be de-contaminated as indicated below:

Guardian Angel gloves can be dry cleaned or laundered.

We recommend that no bleaching or oxidising ingredients or any fabric softeners be used.

Recommended washing temperature is between 40°C and 60°C (104~140°F) with mild detergents.

The drying process may cause felting on the fabric surface. Drying temperature should not exceed 60°C (140°F).

There is no remarkable impact on cut resistance and anti-impact during the normal life cycle of a glove however, depending on glove construction, staining and cleaning method, the differences in shrinkage, weight loss, yarn strength and colour may occur. In order to maximise the glove life cycle we recommend the mildest possible cleaning conditions in terms of temperature, chemicals and cycle duration.

Due to a wide variety of possible constructions and combinations with other materials we recommend to always consult your professional cleaning service to determine the best suitable cleaning method.

Storage:

Store the gloves in the original packaging in a cool dry place and out of direct sunlight and UV light.

Packaging:

The standard packaging for the gloves are as follows. The gloves are not packed in individual bags "inbg". The gloves are packed per dozen in bundles of a polybag "plbg". The "plbg" glove bundles are placed in cardboard cartons "ctn" suitable for transportation and storage.

Obsolescence:

Stored correctly, the gloves physical properties will not change for up to three years.

None of the materials or processes used in the manufacture of these products is known to be harmful to the wearer. The manufacturer has examined under the system for ensuring quality of production by means of monitoring and inspection. The gloves are designed to accommodate the basic safety requirements and standards for Personal Protective Equipment. The information contained herein is intended to assist the wearer in the selection of personal protective equipment. Actual conditions of use cannot be directly simulated in a test environment so it is therefore the responsibility of the end user and not the manufacturer or supplier to determine the gloves suitability for the intended use.

All gloves should be thoroughly inspected before use to ensure no damage is present

TUFF-E-NUFF

MARKING

Tested in accordance with the European directive for PPE (89/686/EEC) for simple design, and is compliant with EN 420, EN 388.
